

Prestashop

Dupa transfer-ul site-ului de pe un domeniu/server pe altul nu se incarca imaginile in Prestashop, ce sa fac?

In cazul in care dupa migrarea site-ului creat pe platforma Prestashop nu va mai apar imaginile produselor si nici thumbnail-urile acestora incercati sa le regenerati urmand urmatoarea procedura:

- dupa logarea in Admin mergeti la meniul **Configure**
- alegeti meniul **Traffic & SEO**

- dati scroll pana intalniti meniul **SET UP URLS**

⚙️ SET UP URLS

Friendly URL	<input checked="" type="radio"/> YES	<input type="radio"/> NO
Accented URL	<input type="radio"/> YES	<input checked="" type="radio"/> NO
Redirect to the canonical URL	<input type="text" value="301 Moved Permanently (recommended)"/>	
Disable Apache's MultiViews option	<input type="radio"/> YES	<input checked="" type="radio"/> NO
Disable Apache's mod_security module	<input type="radio"/> YES	<input checked="" type="radio"/> NO

Prestashop

- dezactivati **Friendly URL**, salvati si apoi reactivati **Friendly URL** si salvati (aceasta operatiune va regenera .htaccess)

Id-ul solutiei unice: #1150
